Subject: Executive Team Changes at CSIRO

Colleagues

Geoff Garrett has indicated that he is changing responsibilities of members of the Executive Team to formally take effect in July, although there will be some transitioning within the positions. A new position of Executive Director Business development is to be filled by Rod Hill, and Michael Barber will act as Group Executive for IMM for at least 06/7 year. Science leadership will be provided by Jim Peacock (50% time – note his other 50% is as Chief Scientist for John Howard) assisted by Tony Haymet. Although not mentioned in his latest email, Geoff has previously indicated that Ron Sandland reaches retirement age mid year. More detail around these changes will be available shortly.
